

TMC Racing Presents: High Performance Billet Valve Bodies

200 4R Billet Control Body

700-R4 Billet Control Body & Controller

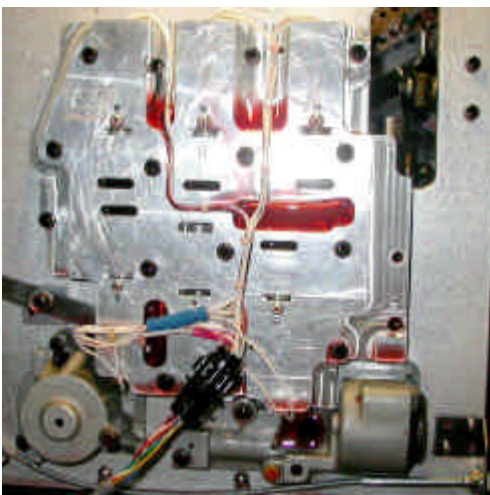

Upgrade your older transmission with electronic control for unparalleled performance at the strip or on the street.

Control Body Features:

- Direct Solenoid Control for fastest possible shifts
- Bolts in Place of existing valve body, no major modifications
- Available with or without Manual Valve
- 200 4R, 700-R4, THM350, THM400, 4L80E and Torque Flight applications available.

Control System Features:

- Two Different Shift Modes
- Manual Mode: Upshift and downshift at the press of a button. Can be used with paddle wheel style steering wheels
- Strip Mode: User selectable RPM shift point. Set the shift RPM and controller will automatically upshift to next gear each time engine hits target RPM
- Integrated hydraulic Trans Brake. Can be tied to a switch mounted on Brake Pedal.
- Custom shift patterns available
- Interfaces easily with paddle shift steering wheels
